

Abstract

Now a day Social Entrepreneurship is the one of the fast- growing fields in the world. Social entrepreneurship is basically doing business for a social cause. It is combination of commerce and social issues that provide solution in a way that improves the lives of people connected to the cause. The concept of Social Entrepreneurship has not arrived at a full understanding in Pakistan so far. In Pakistan social, economic and environmental problems are constantly increasing year after years. Various Social problems of the society can be solved, if Government, private sector and community get inspiration from Social Entrepreneurship to build homegrown solutions. The key intention of the research is too intricate an entrepreneurial institute framework in Pakistan.

As far as social entrepreneurship is concerned, the term has seen limited practical saga, to be specifically identified as so for last three decades only. Hence the tradition though developed globally, is yet constrained specifically in countries like Pakistan.
